Compliance with POP Regulation

RLS confirms compliance with the Persistent Organic Pollutants (POPs) Regulation (EU) 2019/1021, including its consolidated version of 3 December 2025, which implements EU obligations to eliminate or restrict POPs due to their persistence and environmental and health risks. [eur-lex.europa.eu],

Recent updates include:

- Addition of Dechlorane Plus to Annex I with phased limits and restricted exemptions.
- Inclusion of UV 328 under Annex I with strict prohibitions and staged UTC thresholds.
- Tightened PFOS thresholds applicable from December 2025.

RLS declares that no substances listed as POPs are purchased, produced, or used within the company. Environmental compliance documentation is required from all suppliers and checked in SiliconExpert database to ensure POP free materials throughout the supply chain.

All standard RLS products fully comply with the requirements of Regulation (EU) 2019/1021 and all current amendments.

RLS continuously monitors EU regulatory updates to maintain ongoing compliance with all applicable POP restrictions.

Approved by:
Matija Novak,
Director

Date: 17. 2. 2026
