Packaging and Packaging Waste Regulation (PPWR) - Company Policy Statement

Regulation (EU) 2025/40 on packaging and packaging waste (PPWR)

RLS Merilna tehnika d.o.o. is committed to minimizing the environmental impact of its products and packaging while ensuring adequate protection of products throughout transportation, storage and handling.

Packaging used for RLS products consists primarily of corrugated cardboard transport boxes, paper-based materials, polymer bags, labels and auxiliary packaging components supplied by qualified packaging suppliers. Information regarding packaging materials is based on supplier declarations and technical documentation.

Packaging minimization
RLS packaging is designed to provide the minimum amount of packaging necessary to ensure adequate product protection and prevent damage during transportation and storage.

Reuse
Many packaging components used by RLS are technically suitable for repeated use.

Recyclability
The primary packaging material used for shipment of RLS products is corrugated cardboard, which is widely recyclable within established waste collection systems.

Heavy metals
Based on supplier information, RLS believes that the sum of concentrations of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr VI) present in packaging and packaging components does not exceed 100 mg/kg.

Food contact materials
Packaging used for RLS products is not intended for direct contact with food.

PFAS
To the best of RLS knowledge and based on supplier information, PFAS substances are not intentionally added to the packaging supplied for RLS products.

Supply chain information
RLS obtains packaging-related compliance information from its packaging suppliers.

This statement is based on information available at the date of issue and may be updated as additional information become available.
